 - Databases (SQLite, PostgreSQL, MongoDB)
 - Web Development (Django, Html, CSS, React, Next Js, Wordpress)
 - Data Analytics (Python, SQL, Excel, Pandas, Matplotlib, Tableau, Data Visualization)
-

PROJECTS

AUTOMATED AFRICAN ARMYWORM MONITORING AND EARLY WARNING SYSTEM

For my final year project, I developed an IoT-based African armyworm monitoring system that utilizes computer vision and artificial intelligence to help farmers monitor African Armyworm populations in their fields and make decisions based off the data collected.

ARTFORZIM

I developed an ecommerce website to help Zimbabwean artists to advertise sell their arts and crafts on the international market. The website was deployed on artforzim.com.
